

Invest in quality – pay less to maintain it!

Choosing a new machine is tough. Often, its purchase price is one of the deciding factors. But solely considering the initial cost is not enough to make an informed decision.

Competitor Machines

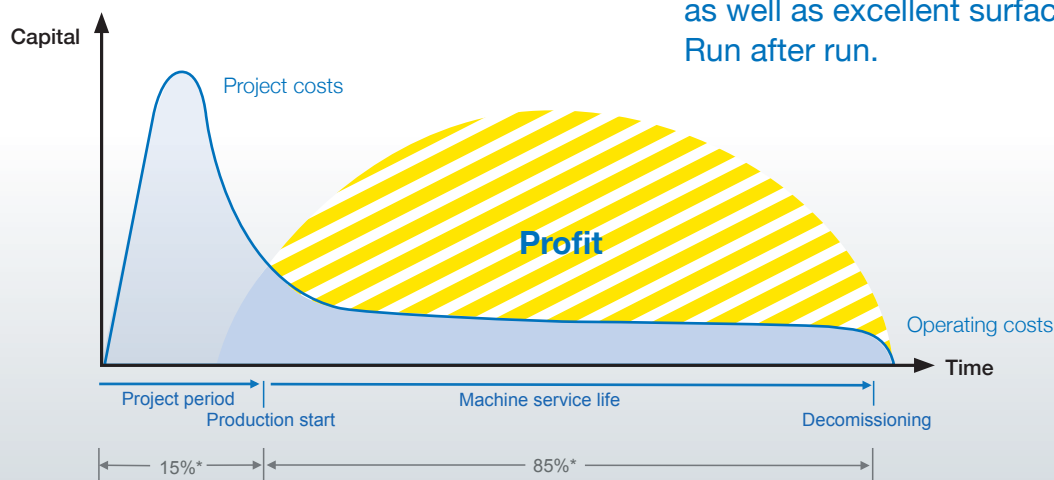

The entire life cycle matters

Only 15 % of a machine's overall cost is its purchase. 85 % is its operation. A lack of productivity due to machine stops, maintenance etc. is going to cost you – literally and continuously.

Okuma Machines

Okuma machines are known for minimum downtime, fast workpiece changeovers and tool changes as well as excellent surface quality. Run after run.
